

little scientists

This program introduces students to what science is and what a scientist does. Through discussions, observations, experiments, and using simple scientific tools, students discover that science is fun for everyone.

CURRICULUM CONNECTION — Senses

Greeting and Introduction

Welcome and organization

Program Activities

- **Science is...**
Through discussion, the children become aware of what science is and what scientist do.
- **Magnif-eye-ing**
The children become scientists by using magnifying lenses to explore the Discovery Centre “upclose.”
- **Whorls, loops and arches**
The children make finger prints, then examine and classify them.
- **Dizzy designs**
Using markers and a piece of paper, children will design their own optical illusion disc.
- **Rainbow experiments**
What happens when you mix different kinds of sand and water? What happens to milk when you add soap to it? These colourful experiments will surprise you!

Conclusion and Departure

Summarize, questions and prepare to depart
